INTRODUCTION

During the past year the Association has compiled this national survey of licences and permits required by provincial, territorial, and federal regulatory bodies in Canada's northern regions. For the purposes of the survey "northern" was taken to include the two Territories, the remote regions of the provinces, and adjacent waters off the east coast.

The information between these covers is not intended to replace the regulation or legislation of the various jurisdictions. It is a lay person's guide to be used as a first reference for the researcher who is interested in knowing the relevant jurisdiction and the required procedures. The user is advised to contact the agency or agencies involved for official advice and guidance.

Scientists from abroad should be aware that there may be additional requirements, especially for expeditions or investigations originating overseas. These stipulations apply primarily to the use of foreign flag vessels or aircraft. Canadian embassies or consulates are an appropriate point of contact for such enquiries.

The Research and Field Facilities Committee of the Association wishes to thank all those government agencies who so readily responded with the information now in this book.

David A.W. Judd
Executive Director

June 1984

INTRODUCTION

Au cours de la dernière année, l'Association a fait un relevé national des licences et permis émis par les organismes de réglementation fédéraux, provinciaux et territoriaux dans le cadre de la recherche scientifique dans les régions nordiques du Canada. Aux fins de ce relevé, les "régions nordiques" ont compris les deux territoires, les régions éloignées des provinces ainsi que les eaux limitrophes de la côte est du Canada.

L'information qui y figure n'entend pas remplacer les réglements ou lois des diverses compétences. Le répertoire a été conçu avant tout pour servir de guide aux chercheurs en leur fournissant des renseignements de base sur la nature des compétences et des procédures qui s'appliquent dans leur cas. On recommande à nos lecteurs de s'adresser directement à l'organisme ou aux organismes en question pour obtenir des informations précises ou conseils.

Les scientifiques de l'étranger doivent savoir que des conditions supplémentaires sont exigées, particulièrement quand il s'agit d'expéditions ou de programmes de recherches mis sur pied outre-mer. Ces stipulations concernent surtout l'utilisation d'avions ou de navires sous pavillon étranger. Ces scientifiques pourront s'adresser aux ambassades et consulats du Canada, qui les mettront en contact avec les organismes pouvant les renseigner à ce sujet.

Le Comité de la recherche et des installations sur le terrain tient à remercier tous les organismes gouvernementaux qui ont répondu avec empressement à nos requêtes en nous fournissant l'information qui paraît maintenant dans ce document.

David A.W. Judd,
Directeur général

Juin 1984

CANADA

CANADA

General

Research permits (general) are required only in the Northwest Territories and the Yukon. (See separate sections.)

Special

- Department of Environment – See pages 7 - 9
- Department of Fisheries and Oceans – See pages 10 and 11
- Department of Indian & Northern Affairs – Northern scientific research is licensed by the Territorial Governments under their respective Scientists Ordinances. The Department administers the Northern Scientific Training Program and university groups receiving assistance from the Program are responsible for ensuring that students acquire all necessary permits and licences. The Department publishes the "Guide for Expeditions to the Canadian Arctic Islands" . It is available from:

  Northern Policy Directorate,
  Northern Policy and Coordination,
  Department of Indian and Northern Affairs,
  Ottawa K1A 0H4

  The Guide includes information on the following.

- **Game Export Act.** A permit is needed to transport game across any territorial or provincial boundary. "Game" includes whole animals or any part, edible or inedible, but excludes finished or processed goods. Permits are available from some RCMP detachments or any NWT wildlife officers.
- **Firearms.** Expeditions may, if they wish, carry rifles to protect themselves or their equipment from wild animals, particularly polar bear. However, in national parks or national parks reserves no rifles may be carried. Under no circumstances are small arms, such as pistols or revolvers, allowed unless a permit is obtained through your local police agency. Foreign nationals are ineligible for such a permit.
- **Arctic Waters Pollution Prevention Act** prohibits the deposit of waste that would adversely affect Arctic waters in any area north of the 60th parallel. Information: Director General, Northern Environment, Department of Indian & Northern Affairs, Ottawa K1A 0H4.
- **Operation of a radio station** is governed by the Department of Communications. Information: Director, Operations Branch, Telecommunications Regulatory Service, DOC, 300 Slater Street, Ottawa K1A 0C8

- **Aviation regulations.** Information: Director General, Public Affairs, Transport Canada, Ottawa KIA 0N5 or Chief, Airports Division, Government of the Northwest Territories, Yellowknife, N.W.T. XIA 2L9
- **Marine regulations.** Information: Administrator, Marine Administration, Transport Canada, Ottawa KIA 0N7
- **Immigration regulations** apply to all foreign nationals.
- **Customs and Excise regulations** may apply to those coming from outside the country. Information: International Traffic Section, Field Liaison Division, Customs and Excise, Revenue Canada, Ottawa KIA 0L5
- **Permission to use Department of National Defence Bases, or Distant Early Warning Sites.** Contact the following well in advance:

  For DEW sites:
  Director, Air Operations and Training,
  Department of National Defence,
  101 Colonel By Drive,
  Ottawa KIA 0K2

  For DND bases and stations:
  Director, Continental Plans Coordination
  Department of National Defence,
  101 Colonel By Drive,
  Ottawa KIA 0K2
  and
  Commander, Northern Region Headquarters,
  Department of National Defence,
  P.O. Box 6666,
  Yellowknife, N.W.T. XIA 2R3

Consultative: Wilderness Travel Registration System

A voluntary wilderness travel system is operated by the RCMP in cooperation with the Government of the Northwest Territories. Registration forms are available from any RCMP detachment or from:

Travel Arctic
Department of Economic Development & Tourism
Government of the Northwest Territories
Yellowknife, N.W.T. XIA 2L9

DEPARTMENT OF ENVIRONMENT

Atmospheric Environment Service

AES does not impose or administer any regulations respecting permission and conduct of research in the north. It operates weather stations at two places remote from communities, namely Eureka on Ellesmere Island and Mould Bay on Prince Patrick Island. The associated aerodromes are "public" but were established and are operated solely to support the High Arctic Weather Stations. Facilities are extremely limited. It is recommended that reference be made to the published information in Sections A19, A41 and B24 of the Northern Supplement (see page 17 – AIR) for utilization of the aerodromes. Requests for meals and accommodations require prior approval at least six weeks in advance from: –

Regional Director,
Atmospheric Environment Service,
Environment Canada
10th Floor – 266 Graham Avenue,
Winnipeg, Manitoba R3C 3V4

and telephone contact for further information is available through the Superintendent, Arctic Operations at 204-949-4933.

Canadian Forestry Service

CFS has no specific regulations or policies applicable to non-government research on or in northern forests. Permits for research on pesticides must be obtained from:

Director, Pesticides Division,
Agriculture Canada,
Neatby Building, Carling Ave. & Maple Drive,
Ottawa, Ontario KIA 0C6

Canadian Wildlife Service

Canadian Wildlife Service has regulations and policies on northern research in Migratory Bird Sanctuaries and Wildlife Areas under the Canadian Wildlife Act. Researchers on wildlife subjects must obtain permission to do research on Migratory Bird Sanctuaries and Wildlife Areas at the following addresses:

Canadian Wildlife Service
Western and Northern Region
1000, 9942 – 108 Street
Edmonton, Alberta T5K 2J5

Canadian Wildlife Service
P.O. Box 340
Delta, British Columbia
V4K 3Y3

For areas other than Migratory Bird Sanctuaries and Wildlife Areas the necessary permission must be obtained from the appropriate Governments of the Yukon or the Northwest Territories.

Information on Migratory Birds

Banding Permits may be obtained from:

Canadian Wildlife Service,
Environment Canada,
351 St. Joseph Blvd.,
Hull, Quebec KIA 0E7

Scientific Permits, Avicultural Permits and information concerning Sanctuaries and Wildlife Areas may be obtained from:

Canadian Wildlife Service,
Western and Northern Region;
1000, 9942 – 108 Street,
Edmonton, Alberta T5K 2J5

Environmental Protection Service

EPS has not identified any policies or practices that would constrain northern research. Research projects dealing with pollution problems may consult with EPS for background data, and researchers must follow all Territorial, DIAND, DFO, MOT, etc. regulations. However, the EPS mandate includes responsibility for administrating a large number of statutes designed to protect the environment, many of which apply equally to the north as to other parts of the country. Some may constrain or limit a particular research activity. Contact:

EPS Regional District officers in the Territories for licensing and/or regulatory implications of different types of northern research activities.

Federal Environmental Assessment Review Office

Federally sponsored or conducted activities, including research activities, must be examined for potential environmental consequences. This would apply to university research if supported by federal funds. Contact:

Dr. P.J.B. Duffy, Director,
Western and Northern Region,
FEARO,
Ottawa KIA 0H3

Inland Waters Directorate

IWD has no regulations or practices that would constrain northern research.

Lands Directorate

The Lands Directorate has no regulations or practices that constrain northern research. Territorial permits must be obtained for all land-related research in the Yukon or Northwest Territories.

Parks Canada

Natural Resources Research

Researchers should consult the directive "Research and Collection Activities in National Parks" (4.4.12). Among items covered are:

1. A Parks Canada Research Permit is required to conduct any applied or benchmark research or collection activity in a national park. Permits are required by contracted researchers, other government personnel, universities, institutions, individuals, private and public organizations or corporations and Parks Canada staff (when not in the performance of their regular duties) engaging in research and collection activities in a national park.
2. a) Research and collection activities within national parks must not cause significant impact on the resource studied and minimal interference with: other park resources, uses, operations, management, or visitors.
   b) All research and collection activities must satisfy Parks Canada Management Directive 2.4.2 – "Environmental Assessment and Review in Parks Canada".
3. Research proposals must be approved in advance. There is a prescribed format for proposals.

Parks Canada regulations cover permission for removing flora or other natural objects for scientific purposes, removal of historical objects for museum purposes, operation of aircraft in national parks, and authorization of the taking or killing of wildlife for scientific purposes.

Contact: Mr. David Lohnes,
National Resources Division,
National Parks Branch,
Parks Canada,
Department of Environment,
Ottawa KIA IG2

Socio-Economic Research within Parks Canada lands, properties or facilities – there is a mandatory research review and registration process for all solicited research. University-based unsolicited research may, at the option of the Park Superintendent or Regional Director, by-pass this formal review and registration process. Future regulations will require a research permit similar to that required for natural resources research in National Parks. Contact:

Mr. S. Meis,
Socio-economic Information,
Socio-economic Branch,
Parks Canada,
Department of Environment,
Ottawa KIA IG2

DEPARTMENT OF FISHERIES AND OCEANS

MARINE MAMMALS AND FISH

Legislative Authority

Fisheries Act, Section 4

Purpose

To ensure that:
1. conservation of the species is not threatened;
2. research is conducted in a responsible way;
3. government and local people are apprised of the project;
4. information will ultimately be available to management authorities.

Coverage

Anyone wishing to conduct research on marine mammals or fish anywhere in Canada.

Application

Applications require information of the following types.

Apply to the Director General of the appropriate region and include the following information:

- the research organization
- sponsoring agency, if any
- research program
- personnel
- dates of proposed program
- location of the study
- species to be studied
- sample sizes
- capture gear or methods of capture
- any other pertinent information.

The review process and criteria for approval are not stated.

Reporting Requirements

The Department will require comprehensive information on the fish/marine mammals sampled and may require that researchers explain a project to local people. It will expect to receive copies of published material.

Appeal Procedure

If a permit is refused, the applicant may place his case in written form before the Minister for his consideration.

Addresses

1. *Northwest Territories, Hudson Bay and Hudson Strait*

   Director General
   Western Region
   Dept. of Fisheries and Oceans
   The Freshwater Institute
   501 University Crescent
   Winnipeg, Manitoba
   R3T 2N6

2. *Québec Coastal Waters*

   Director General
   Québec Region
   Dept. of Fisheries and Oceans
   901 Cap Diamant,
   P.O. Box 15,500
   Québec, Québec G1K 7X7

3. *Yukon*

   Director General
   Pacific Region
   Dept. of Fisheries and Oceans
   1090 West Pender Street
   Vancouver, B.C. V6E 2P1

   For Yukon coastal waters a copy of the application should also be sent to the Director General, Western Region

4. *Baffin Bay, Davis Strait*
   a) *Ship based research*

   Director General
   Newfoundland Region
   Dept. of Fisheries and Oceans
   P.O. Box 5667
   St. John's, Nfld. A1C 5X1

   b) *Shore based research*

   Director General
   Western Region
   Dept. of Fisheries and Oceans
   The Freshwater Institute
   501 University Crescent
   Winnipeg, Manitoba
   R3T 2N6

5. *Labrador*

   Director General
   Newfoundland Region
   Dept. of Fisheries and Oceans
   P.O. Box 5667,
   St. John's, Nfld. A1C 5X1

CANADA

Permis généraux

Les permis de recherche (généraux) ne sont exigés que pour les Territoires du Nord-ouest et le Yukon. (Voir les sections distinctes)

Permis spéciaux

- Environnement Canada – voir les pages 15 à 18
- Pêches et Océans – voir les pages 19 et 20
- Affaires indiennes et du Nord Canada – Ce sont les gouvernements territoriaux qui régissent la recherche scientifique dans le Nord, par le truchement de leurs ordonnances sur les activités scientifiques. Ce ministère gère le Programme de formation scientifique dans le Nord; les équipes universitaires subventionnées dans le cadre de ce Programme doivent s'assurer que les étudiants obtiennent tous les permis et autorisations nécessaires. Le Ministère publie le "Guide pour des expéditions dans l'archipel Arctique canadien", qu'on peut se procurer à l'adresse suivante:

  Direction de la politique du Nord, Direction générale de la politique et de la coordination du Nord, Ministère des Affaires indiennes et du Nord, Ottawa K1A 0H4

  Ce Guide contient des renseignements sur les questions suivantes:

- **Loi sur l'exportation du gibier.** Un permis est obligatoire pour transporter du gibier dans les limites territoriales ou provinciales. Par "gibier", on entend les animaux entiers ou toute partie de l'animal, comestible or non comestible, mais non les produits finis ou transformés. On peut se procurer un permis auprès de certains détachements de la Gendarmerie royale du Canada (G.R.C.) ou de tout agent de la faune des Territoires du Nord-Ouest.
- **Armes à feu.** Les membres des expéditions peuvent, s'ils le désirent, se munir d'une carabine afin de se protéger et de protéger leur matériel des animaux sauvages, en particulier de l'ours blanc. Cependant, dans les parcs nationaux, personne ne peut avoir une carabine. Les pistolets ou les revolvers sont formellement interdits sans un permis obtenu de votre poste de police locale. Les étrangers sont inéligibles pour un tel permis.
- **Loi sur la prévention de la pollution des eaux arctiques.** Cette loi interdit le déversement de déchets susceptibles d'avoir des effets nocifs dans les eaux arctiques situées au nord du 60e parallèle de latitude nord. Pour obtenir de plus amples renseignements, prière de s'adresser au: Directeur général, Environnement du Nord, Affaires indiennes et du Nord Canada, Ottawa K1A 0H4

- **Exploitation d'une station de radiodiffusion.** Cette activité est régie par le ministère des Communications. Pour tous renseignements s'adresser au Directeur, Direction de l'exploitation, Service de la réglementation de la radiodiffusion, Ministère des Communications, 300, rue Slater, Ottawa K1A 0C8

- **Règlements aériens.** Renseignements: Directeur général, Affaires publiques, Transports Canada, Ottawa K1A ON5 ou Chef de la division des aéroports, Département du Gouvernement local, Gouvernement des Territoires du Nord-Ouest, Yellowknife, T.N.-O. X1A 2L9

- **Règlements maritimes.** Renseignements: Administrateur, Administration canadienne des transports maritimes, Transports Canada, Ottawa K1A 0N7.

- **Réglementation de l'immigration.** Elle s'applique à tous les ressortissants de pays étrangers.

- **Réglementation des douanes et de l'accise.** Elle peut s'appliquer aux personnes venant de l'étranger. Pour tous renseignements, s'adresser au: Section du trafic international, Division de la liaison avec les services extérieurs, Revenu Canada, Douanes et accises, Ottawa K1A 0L5

- **Autorisation pour se servir des stations avancées de pré-alerte et bases du ministère de la Défense nationale.** Longtemps avant votre départ, adressez-vous au:

  Pour les stations avancées de pré-alerte:
  Directeur, Instruction et Opérations aériennes
  Ministère de la Défense nationale,
  101, promenade Colonel By,
  Ottawa K1A 0K2

  Pour les bases du MDN et les stations,
  Directeur, Coordination des plans continentaux,
  Ministère de la Défense nationale,
  101 promenade Colonel By
  Ottawa K1A 0K2
  et
  Commandant, Quartier général de la région du Nord,
  Ministère de la Défense nationale,
  B.P. 6666,
  Yellowknife, T.N.-O. X1A 2R3

Formalité facultative: Système d'enregistrement des voyages dans des lieux éloignés

La G.R.C., en coopération avec le gouvernement des Territoires du Nord-Ouest, s'occupe d'un système d'enregistrement des voyages dans les lieux éloignés. Il s'agit d'un service gratuit qui a fait ses preuves dans les cas de détresse. Des formulaires d'enregistrement sont disponibles auprès de tous les détachements de la G.R.C. ou encore on peut s'adresser à Travel Arctic, Département de la Promotion économique et du Tourisme, Gouvernement des Territoires du Nord-Ouest, Yellowknife, T.N.-0. XlA 2L9

ENVIRONNEMENT CANADA

Service de l'environnement atmosphérique

Le SEA n'impose ni n'applique aucune réglementation en matière d'autorisation et de réalisation des recherches dans le Nord. Il exploite deux stations météorologiques en deux localités éloignées de toute agglomération, soit Eureka dans l'Ile d'Ellesmere et Mould Bay dans l'Ile du Prince-Patrick. Les aérodromes voisins sont "publics", mais ont été établis pour les besoins des stations météorologiques de l'Extrême-Arctique, et ne sont exploités que dans ce but. Les installations sont rudimentaires. On recommande de prendre connaissance des renseignements fournis dans les sections Al9, A4l et B24 du Northern Supplement (voir page 17 – AIR) pour utiliser ces aérodromes. Les demandes de repas et de logement doivent être approuvées préalablement avec au moins six semaines d'avance, par le:

Regional Director
Atmospheric Environment Service
Environment Canada
10th Floor – 266 Graham Avenue
Winnipeg, Manitoba R3C 3V4

On peut obtenir d'autres renseignements en prenant un contact téléphonique par l'intermédiaire du Directeur des opérations arctiques (Superintendent, Arctic Operations), au nº (204) 949-4933.

Service canadien des forêts

Ce Service n'impose aucune réglementation ou ligne de conduite particulière aux recherches non officielles sur les forêts boréales, ou qui y sont accomplies. Pour les recherches sur les pesticides on doit obtenir un permis auprès du:

Directeur de la Division des pesticides,
Agriculture Canada
Édifice Neatby, Carling Ave. & Maple Drive
Ottawa, Ont. KIA 0C6

Service canadien de la faune

Le Service canadien de la faune impose une réglementation et des lignes de conduite aux recherches nordiques sur les refuges d'oiseaux migrateurs et les réserves fauniques sous l'empire de la Loi sur la faune du Canada. Les chercheurs s'intéressant à la faune doivent obtenir tout permis d'effectuer des recherches sur les refuges d'oiseaux migrateurs et les réserves fauniques en s'adressant à l'un des organismes suivants:

Canadian Wildlife Service
Western and Northern Region
1000, 9942 – 108 Street
Edmonton, Alberta T5K 2J5

Canadian Wildlife Service
P.O. Box 340
Delta, B.C. V4K 3Y3

Les chercheurs s'intéressant à la faune des régions à l'extérieur des refuges d'oiseaux migrateurs et des réserves fauniques doivent obtenir des permis auprès des administrations compétentes du Yukon ou des Territoires du Nord-ouest.

Information concernant les recherches sur les oiseaux migrateurs

Les permis de baguage sont délivrés par le:

Service canadien de la faune
Environnement Canada
351 boulevard St-Joseph
Hull, Qué. K1A 0E7

Les permis de recherche scientifique, les permis d'aviculture faunique et les renseignements concernant les refuges d'oiseaux et les réserves fauniques sont disponibles auprès du:

Canadian Wildlife Service
Western and Northern Region
1000, 9942 – 108 Street
Edmonton, Alberta T5K 2J5

Service de la protection de l'environnement

Ce Service n'a pas mis en évidence une politique ou des usages qui restreindraient la recherche nordique. Les chercheurs menant à bien des travaux sur les problèmes de pollution peuvent demander des données contextuelles au SPE, et ils doivent respecter tous les règlements des administrations territoriales, de l'AIN, de Pêches et Océans Canada, de Transports Canada, etc. Cependant, le mandat du SPE le charge d'appliquer un grand nombre de lois destinées à protéger l'environnement, et dont beaucoup s'appliquent dans le Nord canadien comme aux autres régions du pays. Quelques-unes peuvent limiter ou restreindre certaines activités de recherche. Les intéressés doivent prendre contact avec:

Les directeurs de district régional du SPE (EPS Regional District Officers) dans les Territoires, pour leur demander des permis d'accomplir des recherches dans le Nord, et quels sont les aspects réglementaires des différents genres de recherche.

Bureau fédéral d'examen des évaluations environnementales

Les activités financées par l'Administration fédérale ou réalisées par celle-ci, y compris les recherches, doivent être analysées pour déterminer leurs répercussions éventuelles sur l'environnement. Cette observation s'applique donc à la recherche universitaire subventionnée par l'Administration fédérale. Les intéressés doivent prendre contact avec:

M. P.J.B. Duffy, Directeur
Région de l'Ouest et du Nord
BFEEE
Ottawa, Ont. K1A 0H3

Direction générale des eaux intérieures

La DGEI n'a aucune réglementation ou usage restreignant la recherche nordique.

Direction générale des terres

La DGT n'a aucune réglementation ou usage restreignant la recherche nordique. Les chercheurs doivent obtenir des permis des administrations territoriales pour toute recherche concernant les terres du Yukon ou des Territoires du Nord-ouest.

Parcs Canada

Recherches sur les ressources naturelles

Les chercheurs doivent consulter la directive 4.4.12; "Activités de recherche et de collecte dans les parcs nationaux". Voici quelques remarques parmi les questions traitées:

1. Tout chercheur effectuant des recherches appliquées ou des études de référence, ou recueillant des objets dans un parc national doit obtenir un permis de recherche de Parcs Canada. Ces permis sont exigés des chercheurs sous contrat de l'Etat, des universités et des établissements publics, des chercheurs individuels, des agents des organismes publics ou privés ou des entreprises, des agents de Parcs Canada (quand ils ne sont pas en service ordinaire) qui accomplissent des activités de recherche ou de recueil d'objets dans un parc national.
2. a) Les activités de recherche et de collecte accomplies dans les parcs nationaux ne doivent pas avoir de répercussion notable sur les ressources étudiées et ne causer que le minimum de gêne aux autres ressources, à l'utilisation, à l'exploitation ou à la gestion des parcs, et à leurs visiteurs.
   b) Toutes les activités de recherche et de collecte doivent respecter la Directive de gestion 2.4.2 de Parcs Canada: "Evaluation et examen en matière d'environnement".
3. Les projets de recherche doivent être approuvés d'avance. Ces projets doivent être présentés sous la forme prescrite.

La réglementation de Parcs Canada porte sur le recueil de spécimens de flore ou d'autres objets dans un but scientifique, l'enlèvement d'objets historiques dans un but muséologique, l'utilisation d'avions et autres aérodymes dans les parcs nationaux, et la capture ou la mise à mort d'animaux sauvages dans un but scientifique, toutes activités nécessitant une autorisation. Les intéressés doivent prendre contact avec:

M. David Lohnes,
Division des ressources naturelles
Direction des parcs nationaux
Parcs Canada
Ottawa K1A 1G2

Les projets commandités de recherche socio-économique qu'on se propose de réaliser dans les terres, immeubles ou installations de Parcs Canada doivent subir un processus obligatoire d'analyse et d'enregistrement. Quant aux projets universitaires spontanés de recherches, le directeur général des Parcs ou le directeur régional peuvent, à leur gré, les exempter de ce processus administratif d'analyse et d'enregistrement. La réglementation à venir exigera l'obtention d'un permis de recherche semblable à celui de la recherche sur les ressources naturelles des parcs nationaux. Les intéressés devront prendre contact avec:

M. S. Meis
Information socio-économique
Direction de la recherche socio-économique
Parcs Canada
Environnement Canada
Ottawa KIA IG2

PÊCHES ET OCÉANS CANADA

MAMMIFERES MARINS ET POISSONS

Mandat législatif

Loi sur les pêcheries, article 4

Objectif

La réglementation vise à:
1. empêcher que la perpétuation de la faune marine ne soit menacée;
2. assurer que la recherche pertinente est menée avec compétence;
3. mettre les autorités publiques et les gens de la région au courant du projet entrepris; et
4. assurer que les données recueillies seront communiquées ultérieurement aux gestionnaires.

Personnes visées

Tout chercheur effectuant des travaux sur les mammifères marins et les poissons, partout au Canada

Demandes d'autorisation

Les demandes adressées au directeur général de la région concernée doivent inclure les renseignements suivants:

- nom de l'organisme employant le chercheur;
- nom de l'organisme subventionnaire, le cas échéant;
- description du programme de recherches;
- personnel de recherches;
- calendrier du projet présenté;
- lieu de réalisation de l'étude;
- espèces marines à étudier;
- taille de l'échantillonnage;
- dispositif ou méthodes de capture; et
- toute autre information pertinente.

Le processus d'analyse et les critères d'approbation ne sont pas précisés.

Comptes rendus exigés

Pêches et Océans Canada requiert la communication des données recueillies au sujet des poissons ou des mammifères marins étudiés, et peut exiger que les chercheurs expliquent la nature de leurs travaux aux gens du pays. Il s'attend à recevoir des exemplaires des documents publiés.

Procédure d'appel

Si le permis lui est refusé, le demandeur peut soumettre son dossier sous forme écrite à la considération du Ministre.

Voici les adresses des directeurs généraux

1. *Territoires du Nord-ouest, Baie d'Hudson et Détroit d'Hudson*

   Director general
   Western Region
   Dept. of Fisheries & Oceans
   The Freshwater Institute
   501 University Crescent
   Winnipeg, Manitoba
   R3T 2N6

2. *Eaux littorales du Québec*

   Directeur général
   Région du Québec
   Pêches et Océans Canada
   901, Cap Diamant

NORTHWEST TERRITORIES

YUKON

NORTHWEST TERRITORIES

General

Scientific Research Licence required to carry out research or to collect specimens for use in scientific research. Studies of land animals or archaeology are excepted, since those studies are regulated under special permits.

Special

- An Archaeological Licence is required under the NWT Historical Sites Regulations.
- A Wildlife Research Permit is required for work on land animals.
- A Land Use Permit may be required if the combined size and length of stay of the research party exceeds 100 man days.

Consultative

Where a project would directly affect local residents, advance consultation with the community is required with the Community Council(s).

SCIENTIFIC RESEARCH LICENCE

Legislative Authority

N.W.T. Scientists Ordinance. 1974(3rd), C.10, S.10

Purpose

None stated.

Coverage

Anyone carrying out scientific research, or collecting specimens for use in scientific research. The only exceptions are where the work consists solely of studies on land animals (covered by Wildlife Research Permits) or archaeological studies (covered by Archaeological Licences).

Application

Information requested:

- Names and addresses of project leader, team members working in the N.W.T., affiliation (university), and funding agency.
- Statement of objectives and brief outline of the plan of the proposed study.

- Itinerary while in N.W.T.
- Logistic details, sufficient to show any impact on communities.
- Assurance that financial resources are adequate.

The review process, and criteria for approval, are not stated.

Reporting Requirements

Within 6 months of the date the Licence expires, the licence holder must report on the scientific work done and the information obtained; and such other information as the Commissioner may prescribe. The licence holder may also be required to submit any or all of the specimens collected to the Commissioner, who may dispose of them as he deems proper.

Appeal Procedure

None stated.

Address

Yellowknife, N.W.T. X1A 2C9

ARCHAEOLOGICAL LICENCE

Legislative Authority

Northwest Territories Archaeological Sites Regulations (1960)

Purpose

". . . for the protection and care of archaeological sites in the Northwest Territories"

Coverage

Anyone carrying out archaeological research in the N.W.T.

Application

By letter to the Director, Prince of Wales Northern Heritage Centre

Reporting Requirements

At the close of each season's field work, licence holders shall report: full details of the work performed including details of any stratification or other chronological evidence, catalogue of all specimens collected, copies of all photographs, maps and plans. This requirement can be modified under special circumstances. The Minister is the legal recipient of archaeological specimens; however the Director, through the

Commissioner, acts as his agent in this respect. No archaeological specimen (unless endangered) should be removed without the permission and/or knowledge of the chief archaeologist at the Prince of Wales Northern Heritage Centre.

Appeal Procedure

None stated.

Address

Director, Prince of Wales Northern Heritage Centre
Department of Justice and Public Services
Government of the Northwest Territories
Yellowknife, N.W.T. X1A 2L9

WILDLIFE RESEARCH PERMIT

Legislative Authority

Wildlife Ordinance, 1979

Purpose

None stated

Coverage

Any studies of land vertebrates – i.e. any species of vertebrate other than sea mammals or fish.

Application

(Application form supplied.) Application is made to the Department of Renewable Resources. They, in turn, contact the Hunters' and Trappers' Associations which might be affected. If the HTA(s) approves, the permit is granted.

Reporting Requirements

Permittees of the previous year are reminded that the Department "would appreciate a copy of any reports they have produced from their research".

Appeal Procedure

It the HTA(s) does not support the application, a process of consultation between the HTA and the applicant must be entered into to resolve any differences. (It is unclear if any appeal exists if the differences cannot be resolved.)

Address

Chief, N.W.T. Wildlife Service
Department of Renewable Resources
Government of the Northwest Territories
Yellowknife, N.W.T. X1A 219

LAND USE PERMIT

Required if the combined size of the research party and the length of stay exceeds 100 man days.

Contact: Manager, Land Resources,
Department of Indian and Northern Affairs,
Yellowknife, N.W.T. X1A 2R3

INUVIALUIT FINAL AGREEMENT

On June 5, 1984 the Committee for Original Peoples' Entitlement signed a Final Agreement on a comprehensive land claim with the Government of Canada. Enactment of the settlement awaits passage of enabling legislation in Parliament.

The Inuvialuit beneficiaries will receive title to approximately 91,000 square kilometres of land in the Western Arctic. Included in the settlement region are the towns of Aklavik, Inuvik, Tuktoyaktuk, Paulatuk, Holman and Sachs Harbour (see map).

Responsibility for receiving and managing the Inuvialuit settlement compensation and benefits will rest with a group of corporations owned and controlled by the beneficiaries. Six non-profit Inuvialuit Community Corporations will be established, each one to be controlled by the beneficiaries in the community it represents. Together, they will control the Inuvialuit Regional Corporation (IRC) which, initially, will receive the settlement lands and financial compensation.

Further details of the Agreement can be found in a booklet entitled "The Western Arctic Claim: A guide to the Inuvialuit Final Agreement", which is available from Indian and Northern Affairs Canada, Ottawa, Ontario K1A 0H4.

ORIGINAL BOUNDARY – – – –

INUVIALUIT SETTLEMENT REGION

YUKON

General

Scientists and Explorers Act requires a licence for all scientific research (except archaeology). The Act covers both social and natural sciences and states that no person shall enter the Territory for scientific or exploration purposes and no person shall carry out such purposes in the Territory unless he is the holder of a valid licence issued under Ordinance R.O. 1958, c. 100, s.4.

Special

Archaeological Sites Regulations Permit required for all archaeological research projects.

SCIENTISTS AND EXPLORERS LICENCE

Legislative Authority

Scientists and Explorers Ordinance (1958)

Purpose

- To keep the Yukon informed of research being conducted.
- To ensure that the Yukon benefits by receiving reports and research results.
- To ensure that the research will not cause undue social or environmental harm.

We do not intend through this Act to dictate, determine or regulate research topics or priorities. We feel this is better regulated through the scientific community itself.

Coverage

All scientific research (except archaeology) for which field work is conducted in Yukon. It includes both social and natural sciences.

Application

Applications should be forwarded at least two months prior to the start of field work. Review (of the application) is intended to ensure that the researcher has the backing of a university or other agency, and that work will not cause undue social or environmental harm to the Yukon.

The application will be reviewed by relevant Yukon government agencies, and referred to the Council for Yukon Indians for comment.

Reporting Requirements

Licence application form commits the researcher to the submission of written reports as required on the Licence. Normally two reports are required: 1) A field or progress report, including localities visited and a catalogue of all collections taken, is required before the expiry date of the Licence (normally December 31st). 2) A final report of research conducted is required within one year of completion or termination of the project.

In most cases, research proposals and reports normally submitted by the researcher to his/her sponsoring agency are sufficient for Yukon's requirements.

Appeal Procedure

To the Minister responsible for the administration of the Act.

Address

For further information and application forms contact:

Heritage Branch
Department of Tourism, Recreation and Culture,
Government of Yukon
P.O. Box 2703,
Whitehorse, Yukon Y1A 2C6

ARCHAEOLOGICAL SITES PERMIT

Legislative Authority

Yukon Archaeological Sites Regulation (1956), under the Yukon Act.

Purpose

To ensure that archaeological research is conducted by competent professionals, and that the work will contribute to knowledge of the Yukon's prehistory.

Coverage

All archaeological research conducted in the Yukon, including work by local agencies. A permit is required for each project.

Application

Applications should be forwarded at least two months prior to the start of field work. Applications are normally approved if the principal researcher: has a Master's degree in Archaeology plus two field seasons of experience; is attached to a major institution or university; has a valid research proposal and methodology; and has complied with the terms and conditions of previous permits. Yukon must be assured that the work will not cause undue social or environmental harm.

Applications are referred to the Council for Yukon Indians and the local Indian Band for comment.

Reporting Requirements

Permit application form commits the researcher to the submission of written reports as required on the Permit. Normally, two reports are required: 1) A field or progress report, including copies of site records and artifact catalogues, is required before the expiry date of the Permit (normally December 31st). 2) A final report of research conducted is required within one year of completion or termination of the project. In most cases, research proposals and reports normally submitted by the researcher to his/her sponsoring agency are sufficient for Yukon's requirements.

All artifacts, site location date, copies of field notes, photographs, artifact catalogues and other documents arising from the field work (i.e. maps, plans) shall be deposited with the agency specified on the Permit.

Appeal Procedure

Interdepartmental Committee on Archaeology

- Permit to Construct and Licence to Operate "industrial research and development projects . . . which emit water and air contaminants".

PERMIT TO CONSTRUCT AND LICENCE TO OPERATE

Legislative Authority

Clean Water and Clean Air Acts

Purpose

To control the environmental impact of industrial activities

Coverage

Industrial activities (and 'larger scale industrial research and development projects') which emit water and air contaminants.

Application

Applications must address the control technology to be used, and must indicate the impact on air, water and land resources. Approval contingent on meeting air and water quality standards.

Reporting Requirements

Mass emission rates of air contaminants; mass effluent rate of water contaminants; ambient concentration of air contaminants.

Appeal Procedure

None for the approval provisions.

Special

- Ministry of the Environment Sundry Permit to hunt, trap or kill wildlife for scientific purposes.
- Ministry of the Environment permit to take and possess fish including kokanee but excluding all other species of salmon, from specified non-tidal waters of the Province and by specified capture methods.
- Ministry of the Environment permit to remove crustacea or other aquatic invertebrates from the non-tidal waters of British Columbia.

SUNDRY PERMIT

Legislative Authority

Wildlife Act

Purpose

Not stated

Coverage

Anyone wishing to hunt, trap or kill wildlife under the jurisdiction of the Province of British Columbia for scientific purposes.

Application

A letter explaining the purpose of the investigation and the detailed needs of the investigators. The letter should contain the following: a) who the applicant represents (e.g. museum, university, self, etc.); b) the nature of the investigation/study; c) where and when the investigation will be carried out; d) type of equipment to be used; e) names of any assistants; f) species and number of each species to be killed, collected live, retained, etc.

Reporting Requirements

Summary report must be submitted 90 days after the expiry of the permit.

Appeal Procedure

Not stated

Address

Licences and Permits
Fish and Wildlife Branch

INVERTEBRATE COLLECTING PERMIT

Legislative Authority

Fisheries Act and B.C. Fishery (General) Regulations

Purpose

Not stated

Coverage

Anyone wishing to remove crustacea or other aquatic invertebrates from the non-tidal waters of British Columbia.

Other details as for Fish Collecting Permit (see above)

Salmon are controlled by the Federal Fisheries Department, Victoria

Note: The above permits are not valid in National or Provincial Parks. A separate authorization from Parks Administration must also be obtained. Contact the Parks and Outdoor Division of the Ministry of Lands, Parks and Housing.

MANITOBA

General

None

Special

- A "General Work Permit" is required to conduct research in provincial parks.
- A "General Permit" is required for the collection of scientific material
- A "Scientific Collection Permit" is required to catch or retain fish for scientific purposes and an "Educational Collecting Permit" to catch and retain fish for educational purposes.
- A permit is required to take or possess amphibians and reptiles, wildlife or exotic animals other than migratory birds for scientific purposes (a federal permit being required for migratory birds).
- A permit is required for polar bear research.
- The Department of the Environment instructs researchers that any research that may involve adding compounds and/or contaminants to the environment must be reported to the Department prior to commencement.
- The Department of Education instructs researchers that research utilizing the Manitoba school system must be cleared by local superintendents prior to commencement.

RESEARCH IN PROVINCIAL PARKS

Legislative Authority

Provincial Parklands Act

Purpose

Not specified.

Coverage

Not specified.

Application

Requires statement of purpose, period of time and place of research.

Reporting Requirements

All specimens remain the property of the Crown. Upon completion, a collecting report including field data is to be submitted to the regional interpreter. If specimens have not been collected, copies of a short report must be submitted. If the collection is to be used in the formulation of a thesis, the permitee is required to submit a copy of the thesis to the Regional Director and be willing to supply extra copies at cost.

Appeal Procedure

Not specified

Address

Parks Branch,
Department of Natural Resources,
Province of Manitoba,
Winnipeg, Man. R3H 0W9

GENERAL PERMIT FOR FORESTRY RESERVES

Legislative Authority

Manitoba Forest Act

Purpose

Not specified

Coverage

For licensing the collection of scientific material inside or outside provincial forest reserves.

Application

Not specified.

Reporting Requirements

Not specified.

Appeal Procedure

Not specified.

Address

Forestry Branch,
Department of Natural Resources,
Province of Manitoba,
Winnipeg, Man. R3H 0W9

SCIENTIFIC COLLECTION PERMIT (FISH)

Legislative Authority

Manitoba Fishery Regulations

Purpose

Not specified

Coverage

Anyone catching or retaining fish for scientific purposes.

Application

"Scientific Collection Permit", Department of Renewable Resources and Transportation Services, 1495 St. James Street, Winnipeg, Man. R3H 0W9

Reporting Requirements

A report must be submitted to the Research Branch upon expiration of the permit indicating location, species, number and disposition of collected specimens.

Appeal Procedure

Not specified

Address

Fisheries Branch,
Department of Natural Resources,
Province of Manitoba,
Winnipeg, Man. R3H 0W9

SCIENTIFIC COLLECTOR'S PERMIT (WILDLIFE)

Legislative Authority

Not specified

Purpose

Not specified

Coverage

Anyone working to take or possess wildlife or exotic animals other than migratory birds for scientific purposes (a federal permit is required for migratory birds). A permit must also be obtained to collect amphibians and reptiles.

Application

Applicant must specify names of persons who will assist in the collecting or holding of wildlife. A standard form must be completed at least 30 days prior to the time it is required. An export permit may be required for transporting specimens out of Manitoba or Canada — this will be specified in the conditions of the permit at the time of issue.

Reporting Requirements

A summary report is required upon expiry of each permit and before any permit is renewed. The report will detail the number and species of animals collected and the significant findings.

Appeal Procedure

The Director (or Minister) may cancel a permit at his discretion without prosecution or conviction of the permittee. Permits may also be reinstated provided, in cases of conviction, it was the first offence. No specific sppeal procedure is specified.

Address

Chief, Biological Services,
Department of Natural Resources,
Box 14, 1495 St. James Street,
Winnipeg, Manitoba R3H 0W9
Telephone: (203) 786-9193

POLAR BEAR RESEARCH

Legislative Authority

Not specified

Purpose

Not specified

Coverage

Not specified

Application

A "Project Outline" must be submitted and eight weeks allowed for a permit to be processed from the time it is submitted. An export permit is required for any part of a polar bear to be shipped out of Manitoba.

Reporting Requirements

Annual reports on all projects must be submitted by March 31st of each year or before permit renewals. Permit renewal requests should be submitted along with the annual report by February 1.

Appeal Procedure

Not specified

Address

Chief, Biological Services,
Department of Natural Resources,
Box 14, 1495 St. James Street,
Winnipeg, Manitoba R3H 0W9
Telephone: (204) 786-9193

NEWFOUNDLAND

General

None

Special

- The Crown Lands Act makes it unlawful to occupy Crown Land without the consent of the Minister of Forest Resources and Lands. Occupy under the Crown Lands Act refers to the erection of temporary or permanent structures as opposed to a shelter (tent). A researcher is best advised to consult any one of the Department's four Regional Offices Prior to entering Crown Lands.
- The Forest Travel Restricted Area Order limits travel by non-residents. Non-residents may travel unaccompanied in the restricted area provided a permit is obtained from any of the Regional Offices.
- The Department of Environment must approve certain developments that have a "perceived impact on the environment through the discharge of effluents or emissions".
- Any activity involving the collection of wildlife requires the permission of the Wildlife Division, Department of Culture, Recreation and Youth. The collection, possession and export of wildlife is regulated under Federal and Provincial laws.

Consultative

Individuals planning geoscientific research in Labrador should contact the Director, Mineral Development Division, Newfoundland Department of Mines and Energy, P.O. Box 4750, St. John's Nfld.

CROWN LANDS: APPROVAL TO OCCUPY

Legislative Authority

Crown Lands Act

Purpose

To provide for the orderly disposition and development of Crown Land.

Coverage

Anyone occupying Crown Lands (Approximately 80% of the Province is Crown Land)

Application

Through the Regional Office. The Province is divided into four regions.
Review process not specified

Reporting Requirements

Not specified

Appeal Procedure

No appeal. The decision of the Minister is final.

Address

Head Office,
Government of Newfoundland and Labrador
Department of Forest Resources and Land
Atlantic Place
St. John's, Newfoundland A1C 5T7

Eastern Region – Bldg. 851, Pleasantville, St. John's, Nfld.
Central Region – 30 Airport Boulevard, Gander, Nfld.
Western Region – P.O. Box 2006, Corner Brook, Nfld.
Labrador Region – P.O. Box 370, Goose Bay, Labrador

PERMIT TO TRAVEL IN RESTRICTED AREAS

Legislative Authority

The Forest Travel Act

Purpose

Designed to prevent forest fires.

Coverage

All non-residents wishing to travel in restricted areas during the summer months. A restricted area appears to be just about everywhere outside municipalities and parks.

Application

Through the Regional Office.
Review process not specified

Reporting Requirements

Not specified

Appeal Procedure

No appeal

Address

ONTARIO

General

None

Special

- Any research carried out in Provincial Parks or park reserves must be approved by the Ministry of Natural Resources.
- Scientific Collector's Fish Permit required to take or possess fish or spawn.
- Scientific Collector's Permit required for the killing, capture, and possession of mammals, birds, reptiles and amphibians.
- Land Use Permit may be required for scientific activity on Crown Land.
- Fire Permit (or "Work Permit") may be required under the Forest Fires Prevention Act. Contact Ontario Ministry of Natural Resources.
- Some scientific activity might come under the Environment Protection Act, Ontario Water Resources Act, or Pesticides Act. These requirements can be checked through the Ministry of the Environment offices:

North West Region	P.O. Box 5000 435 James St. South Thunder Bay, Ont. P7C 5G1 807-475-1205
North East Region	199 Larch St. Sudbury, Ont. P3E 5P9 705-675-4501

Or district offices in Kenora, Timmins, Sault Ste. Marie, and North Bay.

- Licence required for Archaeological Exploration, Survey or Fieldwork in the Province of Ontario. Issued by the Minister of Citizenship and Culture.

RESEARCH IN PROVINCIAL PARKS

Legislative Authority

Not specified; presumably regulations under the Provincial Parks Act.

Purpose

Not specified.

Coverage:

Any activities, investigations, or studies of natural, cuitural, social, economic, or other features or characteristics within a Provincial Park or Park Reserve.

Application

Application requires a statement as to why the research should be done in the park rather than some other location. Also tries to establish the expected degree of inconvenience for park staff and visitors.

New proposals are approved by the Regional Director and up to 3 months are required for approvals.

Reporting Requirements

All specimens, artifacts, materials and information remain the property of Ontario. The researcher must submit a final report to the District Manager within two years of the completion of the project, including copies of all publications, theses, etc.

Appeal Procedure

Not specified.

Address

District Manager (of specific Park Area)
Parks and Recreation Branch
Ministry of Natural Resources
Government of Ontario

SCIENTIFIC COLLECTOR'S FISH PERMIT

Legislative Authority

Ontario Fishery Regulations 60(1)

Purpose

Not specified

Coverage

Anyone taking or possessing any fish or spawn for the purpose of stocking, artificial breeding, or for scientific or educational purposes.

Application

Application form requires project description, research topics, identification of capture gear, purpose of catch, and location.

Process and criteria for approval not specified.

Reporting Requirements

Summary of work upon conclusion of the project.

Appeal Procedure

Not specified

Address

Fisheries Branch,
Ministry of Natural Resources,
Whitney Block, Queen's Park,
Toronto, Ont. M7A 1W3

SCIENTIFIC COLLECTOR'S PERMIT

Legislative Authority

Section 48 of the Game and Fish Act, R.S.O. 1970, c.186.

Purpose

Not stated

Coverage

Anyone wishing to kill, capture and possess mammals, birds, reptiles and amphibians, and to take, destroy or possess the eggs or nests of game birds, for scientific or educational purposes.

Application

Applicant must name species, number to be taken, and area. No species may be taken that is endangered or threatened in a given area.

District Manager reviews applications to ensure that the capture is for accepted scientific or educational purposes, applicants have the support of an educational body, permits are given only to those actively taking the animal, captured animals, etc. will not be released to the wild, reports are filed, and other regulations are observed.

Reporting Requirements

- Annual report to the District Manager
- Full records of scientific data available for examination by Ministry officials.
- Advise the nearest Conservation Officer of the research activity.
- When permit expires, submit a complete list of specimens and their disposition to the District Manager.

Appeal Procedure

Not specified.

Address:

Wildlife Branch,
Ontario Ministry of Natural Resources
Whitney Block, Queen's Park,
Toronto, Ont. M7A 1W3

Note: A banding permit is required from the Canadian Wildlife Service for banding of raptors with U.S. Fish and Wildlife Service bands.

LAND USE PERMIT

Legislative Authority

Public Lands Act.

Purpose

Not stated.

Coverage

Requests to use Crown Land for scientific purposes are "generally treated on an individual basis".

Application

Applicants must describe the parcel and purpose. Permit is issued subject to conditions on use, buildings, rights conveyed, etc.

Reporting Requirements

A sworn statement, on demand, describing the use being made of the land.

Appeal Procedure

Not specified.

Address

Ontario Ministry of Natural Resources
Whitney Block, Queen's Park,
Toronto, Ont. M7A 1W3

ARCHAEOLOGICAL EXPLORATION, SURVEY OR FIELDWORK

Legislative Authority

Ontario Heritage Act R.S.O. 1980 Part VI, Conservation of Resources of Archaeological Value

Purpose

The section of the *O.H.A* pertaining to archaeological licensing was designed to encourage carefully planned survey, excavation, and reporting of archaeological resources, and, at the same time, discourage indiscriminate and unproductive destruction of this non-renewable resource.

Coverage

A licence is required by any person conducting archaeological exploration, survey or fieldwork in the Province of Ontario, subject to section 56(1) of the Act, which states that a permit is required for archaeological fieldwork on properties designated under the Act (listed in the regulations).

Application

Licence application and site record forms are available from the Ontario Ministry of Citizenship and Culture, as are background papers and application/report guidelines.

Reporting Requirements

Licensees are required to submit a report, subject to Ministry guidelines, within a reasonable time after the close of the field season. Archaeological Site Record Forms and/or Site update Sheets are also required.

Appeal Procedure

Procedures for appealing a licensing decision are described in the aforementioned Act.

Address

Donna McNeil,
Archaeological Licensing Officer
Ministry of Citizenship and Culture
Heritage Branch
2nd Floor, 77 Bloor Street West
Toronto, Ontario M7A 2R9

Suivant l'Accord de la Baie James et du Nord Québecois, l'autorisation est obligatoire pour des études scientifiques sur les terres de catégorie II. On retrouve cette obligation dans la loi, 1978, chapitre 93, art. 92 (voir ci-dessous).

Consultatif

À cause de problèmes de logistique, les chercheurs doivent à l'avance se mettre d'accord avec l'Hydro-Québec et la Société d'énergie de la Baie James.

Loi

Les Terres de la Catégorie I: Pour les terres de la catégorie I, les chercheurs doivent demander et obtenir la permission de la bande cris ou de la corporation de village inuit, selon le cas. On doit faire une demande conforme en décrivant la recherche à mener, ainsi que les personnes qui l'effectueront.

Les Terres de la Catégorie II: La même démarche que dans le cas des terres de la catégorie I.
Consulter aussi la loi concernant le régime des terres dans les territoires de la Baie James et du Nouveau Québec, art. 92.

Les Terres de la Catégorie III: Aucun permission spécial sauve pour prélever les spécimens fauniques.
